

LIQUID CRYSTAL DISPLAY DEVICE WITH BONDED FLEXIBLE CABLE

5

ABSTRACT OF THE DISCLOSURE

A liquid crystal display device includes a liquid crystal panel, a flexible cable, an illuminating device and a unit cover, which accommodates the liquid crystal panel and the illuminating device. The unit cover is formed by a lower cover and an upper cover coupled to each other, the lower cover and the upper cover each having a lower or upper wall, a side wall, and a wall part bent from the side wall. The flexible cable extends between the wall part of the lower cover and the wall part of the upper cover from the inside to the outside of the unit cover. The flexible cable is interposed between, and held by, the wall part of the lower cover and the wall part of the upper cover.
